A live webcast of each presentation will be available online from the investor relations page of the company's corporate website at <http://ir.immunedesign.com/events.cfm>. After the live webcast, an archive of each presentation will be available on the company website for 30 days.

About Immune Design

Immune Design is a late-stage immunotherapy company employing next-generation in vivo approaches to enable the body's immune system to fight disease. The company's technologies are engineered to activate the immune system's natural ability to generate and/or expand antigen-specific cytotoxic immune cells to fight cancer and other chronic diseases. CMB305 and G100, the leading product candidates with broad potential in oncology, are based on the company's two technology platforms that are potent stimulators of the immune system: ZVex[®] and GLAAS[®]. Both ZVex and GLAAS also have potential applications in infectious disease and allergy indications, which are being developed through ongoing pharmaceutical collaborations. Immune Design has offices in Seattle and South San Francisco. For more information, please visit www.immunedesign.com.
