

Immune Design to Present at Piper Jaffray 30th Annual Healthcare Conference

November 20, 2018

SEATTLE and SOUTH SAN FRANCISCO, Calif., Nov. 20, 2018 (GLOBE NEWSWIRE) -- Immune Design (Nasdaq: IMDZ), an immunotherapy company focused on next-generation therapies in oncology, today announced that management will present at the Piper Jaffray 30th Annual Healthcare Conference on Tuesday, November 27, 2018 at 2:30 p.m. Eastern in New York.

A live webcast of the presentation will be available online from the investor relations page of the company's corporate website at <http://ir.immunedesign.com/events.cfm>. After the live webcast, an archive of the presentation will be available on the company website for 30 days.

About Immune Design

Immune Design is a late-stage immunotherapy company employing next-generation *in vivo* approaches to enable the body's immune system to fight disease. The company's technologies are engineered to activate the immune system's natural ability to generate and/or expand antigen-specific cytotoxic immune cells to fight cancer and other chronic diseases. G100, the company's lead product candidate, is a potent intratumoral TLR4 agonist that has shown clinical benefit in multiple tumor types. Building upon these data, including from a randomized Phase 2 study, Immune Design is developing G100 with a potential first approval path in follicular lymphoma patients, a type of Non-Hodgkin's lymphoma that affects thousands of patients annually. Immune Design's technologies, the fundamental components of which were licensed from the California Institute of Technology and the Infectious Disease Research Institute (IDRI), also have potential application in infectious disease and allergy indications, which are being developed through ongoing pharmaceutical collaborations. Immune Design has offices in Seattle and South San Francisco. For more information, please visit www.immunedesign.com.
